2018-09-18 – ESI Funds for health

# RUVeS - Sweden

New project - parts are enabled from an application to Swedens government agency of innovation.

Project duration: August 2016 - November 2019

Total budget: EUR 533 485

ERDF co-financing rate: 50%

Operational program, thematic object 2

Beneficiars financing rate: 50% , local municipality, regional council, Linneaus University

# Why RUVeS?

- The need of speeding up implementation of welfare and eHealth solutions.
- Healthcare providers need and desire to play an active role in making choices.
- Healthcare providers need to define and communicate their needs.
- The need of follow up and to evaluate ehealth solutions.
- Low number of tenders in the public procurement act.

# What?

The **project wants** to stimulate an open eHealth market that increases the possibility for small and medium enterprises (SME) to supply services/products for public health care.

The **long term effect** - a more innovative and interactive market that contributes to improved growth and increased number of ehealth services.

The **expected result** is a model describing the terms and conditions needed for the cooperation and development among the healthcare providers and SME.

# Focus on

- **Understanding of needs**, desired state and evaluation of utility
- **Procurement process** that promotes an open market
- **Open API's**
- **Collaborative space** – interactive relationship building, trendmonitoring

# Next step

We hope for a RUVeS 2.0
