des Landes Nordrhein-Westfalen

2. Budget

- Total : € 1.886.259,71

- European funds :
943129,83

3. Clients

- Dual diagnosis person: people with mental disability and additional impairment in the field of mental health.
- According to the World Health Organisation (WHO), between 1 and 3% of the world's population is affected by a disability. This makes persons with disabilities (PwD) the world's largest minority.

3. Clients

- A number of scientific studies show that the risk for persons with intellectual disabilities suffering additionally from mental ill health is 3-5 times higher (Dosen 1990; Maes et al. 2004). These people with what is known as a dual diagnosis (DD) frequently find their participation in family, working and social life heavily curtailed, face social exclusion and are affected by poverty more than average. This can be traced back to problematic behaviour (such as aggression, inappropriate sexual conduct etc.) and recurring crises.

3. Goals

- I. Increasing quality of care and inclusion of people with dual diagnosis in Euregio Meuse-Rhin (EMR)
- II. Increasing education of professionals (teacher, educator, nurse, psychologist, general practitioner...) and family by coaching, counseling, education

4. Interventions

- I. Training, supervising mobile team (DD)
- II. Observing, coaching, counseling, exchanging, training with dual diagnosis people and their network (professional or not)
- III. Elaboration of crisis program / professional standards
- IV. Elaboration of specific training program

5. How?

- Professional exchanges : trans-sectorial (Handicap /psychiatry) and trans- regional
- Visits, work groups, training groups
- Specific tools DD sharing
- Congress organisation and participation
- Networking around DD situations, increasing access to healthcare system (hospital, psychiatry, GP, dentist,...)
- Support : coaching, counseling, orientation, diagnostic in situ

Thank you for your
attention
