Health reform

Compliance with WB evaluation

Health reform takes into account the analysis of the conclusions and proposals from the World Bank evaluation on Health System in Latvia:

- ❑ Informative report «On Systematically Important Health Care Institutions' Mapping and Development Reform» – emphasis on concentration of highly specialized services
- ❑ Conceptual report «On Health Care System Reform» - comprehensive national planning document incl. the EU funds investments
 - ✓ Local hospitals (incl. ambulatory services) and GPs with emphasis on accessibility
 - ✓ HR accessibility and development
 - ✓ Quality assurance
 - ✓ E-Health

Ministry of Health
Republic of Latvia

Health reform Challenges

Public health indicators

Hospital network

Primary care service accessibility

Insufficient financing since 2009

Lack of common understanding in patient safety and quality assurance system in health sector

HR

Lack of strategic purchasing

Competency and functions of health sector public institutions
